50 Wealthiest

Greeks in America
50 Wealthiest Greek Americans

How does one measure success? It’s different for each person. Nevertheless, the best human minds strive to find solutions where there are problems, to capture one approach to the same old obstruction — or, in the words of Alfred Lord Tennyson in the poem “Ulysses,” referring to the Roman interpretation of the great Greek hero Odysseus, “To strive, to seek, to find, and not to yield.”

In this, our 2013 issue dedicated to the 50 Wealthiest Greek Americans, we highlight a number of very talented and extremely successful entrepreneurs who have reached the heights of business success. They cover a wide spectrum of industries: finance, technology, publishing, entertainment, engineering, retail, agriculture, medicine, and more. These people have enriched themselves, and we, in doing so, have also enriched our community by providing jobs, business opportunities, and bringing power to others. In that spirit, we attempt to list the number of employees for each individual, to show the free enterprise system at work.

According to their estimated wealth, which is based on Forbes magazine’s rankings and various public sources, we use the same ranking method as Forbes; given, much is expected. The most successful among us are not to yield. In that spirit, we attempt to list the number of employees for each individual, to show the free enterprise system at work.

But then there are the check- ing cause of people who, on the surface, have no such risks but we killed by sudden, random, tragic events.

Massachusetts native George Behrakis, the son of Greek im- migrants who built an im- pressive medical career, has dedicated much of his wealth to medical causes, having seen too many to the fact. And he believed he could make a contribution.

“Healing in the healthcare mar- ket,” he knows that the front- line treatment is often a very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very, very,very intense background in the field of life sciences, he has worked closely with his mentors, Dr. Lambros Michalis, and Michael D. Georgiou, both of whom were instrumental in his success. Behrakis has been sponsoring young Greek doctors trained in the cardiovascular research to come to Boston and work with Stone for two years, then return to Greece where they can put what they learned into practice. So for the Greek, Dr. Behrakis Cardiovas- cular Research Fellowship has been created.

Metropoulos approved as lead bidder for Hostess

By Dawn McCarthy

Bloomberg News and

TNN Staff

C. Dean Metropoulos & Co. won court approval on Feb. 13 to be the among the stalking-horse, or lead, bidders for most of Hostess’s cake and bread brands, seeing the threshold other suitor will have to exceed.

U.S. Bankruptcy Judge Robert Drain in White Plains, N.Y. approved Metropoulos along with Flower Foods Inc., Ripplewood Holdings LLC, and Strategic Investors Inc, as the stalking-horse bidders for Hostess brands.

In January, David Metropoulos, son of C. Dean Metropoulos & Co. and son of Metropoulos & Co. and son of Apollo Global Management LLC. A sole hearing to approve the highest and best bids is set for March 21.

Apollo and Metropoulos offered, as much as $415 million for the Hostess made cakes brands, which includes Dolly Madison brands, five bakeries and equipment. Leon Black’s Apollo, based in New York, snapped up $109.7 billion in assets as of Sept. 30.

Metropoulos, based in Greenwich, Connecticut, is the private-equity firm that owns Buffalo Biscuit Co. The company has a built a reputation in business circles for turning around failing consumer brands, including Hostess and Primer Foods, among others.

Stalking-horse bidders are companies that will be among the stalking-horse bidders for most of Hostess’s cake and bread brands, seeing the threshold other suitor will have to exceed.

Hostess, founded in 1930, is a private-equity firm that owns Buffalo Biscuit Co. The company has a built a reputation in business circles for turning around failing consumer brands, including Hostess and Primer Foods, among others.

Daren Metropoulos, chairman and CEO of C. Dean Metropoulos & Co., which was recently approved as the lead bidder for the cakes business of bankrupt Twinkies maker Hostess Brands Inc.

In January, Daren Metropoulos told TNH the company’s top brands are Nature’s Pride, Home Pride, Merita and Nature’s Pride Brands, 20 bread plants, 28 depots and 170,000 square feet of warehouse space.

Metropoulos offered $306 mil- lion, plus $2.5 million for the Beechwood brand. An auction is set for Feb. 28.

Flowers, established in 1919, produces and markets packaged baked goods for retail and food-service customers. The company’s brands include Wonder, Interstate Brands Corp., Wonder and Twinlyke. Notice, maker of Lodi Dub- bus foodsnacks, agreed to pay $7.5 million for Drake’s, United States Bakery offered to buy the Sweetheart, Edy’s, Stannah Homes and Grandma Emily’s bread brands, five bakeries and equipment, and $109.7 billion in assets as of Sept. 30, for $20.9 million. A March 15 auction date for Drake’s and the four bread brands has been set.

Heather Lazenby, a lawyer for Flowers, said that an agreement on certain brands was reached with four unions covering 233 former employees. A hearing was held on Feb. 21 to approve an agreement with striking bakery workers that includes life insurance benefits and about $102,409, according to court papers. About 244 retirees received medical benefits.

First, he joined the company on his 5th birthday, selling pop corn door to door. He helped his mother with paper routes through their neighborhood, delivering newspapers to get his way into the door. He sold lemonade and started a small business at the age of 12, selling newspapers and lemonade at the corner of his house. By the time he was 16, he had sold paper routes throughout his neighborhood and become a successful entrepreneur.

2. He also started working in the company at the age of 16, selling newspapers and lemonade at the corner of his house. By the time he was 16, he had sold paper routes throughout his neighborhood and become a successful entrepreneur.

3. In 1989, after his partner, Paul Mitchell, died, DeJoria founded another partner and launched John Paul Mitchell Systems (JPM), a premium hair care company. He worked in the industry for several years before launching his own line of products.

4. DeJoria has been quoted saying, "I believe in the power of believing in yourself. If you believe you can do it, you can." He has been a vocal advocate for the importance of education and has donated millions of dollars to various causes.

5. He has received many awards and accolades throughout his career, including the Citizen of the Year Award from the governor of Texas, and he is a lifetime member of the Hellenic Times Scholarship Foundation. He is also a member of the Billionaire’s Club, established in 2013 by CNBC.

6. DeJoria is a self-made man who started with nothing and built an empire through hard work, determination, and innovation.

7. He has created a successful company, John Paul Mitchell Systems, that has grown to become a multi-billion-dollar business.

8. DeJoria is a philanthropist who has contributed millions to various causes, including education, the arts, and social programs.

9. He is also a member of the New York City Board of Education and has served on the boards of several other organizations.

10. DeJoria is a true success story, having started with nothing and built a successful business through hard work, determination, and innovation.

11. He is a living example of the American Dream, having started with a small business and grown it into a multi-billion-dollar company.

12. DeJoria is a true success story, having started with nothing and built a successful business through hard work, determination, and innovation.

13. He is a member of the Billionaire’s Club, established in 2013 by CNBC, and is ranked among the World’s Billionaires, with an estimated net worth of $4.8 billion.

14. DeJoria is a true success story, having started with nothing and built a successful business through hard work, determination, and innovation.

15. He is a member of the Billionaire’s Club, established in 2013 by CNBC, and is ranked among the World’s Billionaires, with an estimated net worth of $4.8 billion.

It was too inflamed and the plaque was enough to cause a heart attack, he said. Those three percent become transformed into an abnormal blood flow patern in the artery. By measuring the friction (the sci-
tific term in "shear stress") of the blood in the artery, we can determine if it's all right or if it's too much, and the per-
tum flow stimulates the plaque and causes it to burst.

For the 5 percent (of plaque deposits) that get worse and worse, the patient is at risk of a heart attack. Mr. Behrakis' hypothesis is that we can figure out which are those 5 percent by looking at the local blood flow paterns on a microscopic level," he said. "That is where we're experimenting with." Stone and his co-researchers have confirmed these findings and have also predicted some other, also some limited clinical trials on humans.

The shear stress is calculated by considering the shear stress (the force per unit area acting on the surface of a moving fluid). The shear stress is caused by the viscosity of the fluid and the rate of the flow of the fluid. The shear stress is also affected by the presence of blood flow paterns in the artery. By measuring the shear stress, we can determine if the plaque is too much, and if it's too much, the plaque will hold the artery open and allow the blood to flow better and then kill us, our hy-

"One shouldn't be afraid of dying," said Antoniadis. "We need to find a way to bring in and to attract young doc-
tors and young scientists from all around the world, and to modernize this research in general in Greece, in order to bring the Greek medical re-

my dear mother, Eugenie Klein in 1984. Over the next ten years, he bought out the shares and took control of the company, and six years later in 1996, he became its CEO. In 2003, he stepped down as CEO, but he continued to manage the company. Spanos, one of the largest private donations to the Republican Party during Presidential election years, helped to raise over $2 million for Sen. John Mccain’s campaign in 2008. Both announced his support to the Kennedy Center in 2004. Spanos has also contributed million in schools, hospitals, and charity. He received the Medal of the Commander of the Order of Honor from Greek President Papadopoulous in 2008.

Spanos has turned the rise of his name over the next move and fences to play cards with his friends. “What the heck I’m 85 years old, and my kids are doing a good job. It’s their turn now,” he said to Forbes. In 2002, Spanos published his autobiography, “The Wealth: My Story.” He and his wife, Calliope, celebrated 63 years of marriage in 2008. His son Dean now leads the team to 97 percent. His son Dean now leads the team.

What you leave behind is not what is engraved in stone monuments, but what is woven into the lives of others.

- Pericles

We salute Greek Americans whose pioneering spirit, ingenuity and passion serve to inspire us all.

As the oldest and largest American college in Europe, The American College of Greece serves as a beacon of U.S. education welcoming students from around the world to its breathtaking campus in Athens.

Your example fuels our hopes for the future of Hellenism.

You are all winners in our book.

The Dow CEO—Chairman with roots in Kazakhstan, Geras was born in Dnepropetrovsk, Ukraine. As his student body was not satisfied with the current management, they decided to take matters into their own hands. In January 1982, Geras was appointed as the director of the Dnepropetrovsk State University, a position he held until 1984. In 1984, he was invited to the United States as a visiting scholar at the California Institute of Technology, where he worked on the development of biopolymers.

In 1993, Geras joined the Harvard Business School as a visiting professor, where he conducted research on the economics of biotechnology and the biopharmaceutical industry. He later became a full-time faculty member and served as the director of the Harvard Institute for Biotechnology Policy and Economics. In 1999, he was appointed as the CEO of Genentech, a leading biotechnology company.

Geras' leadership during his tenure at Genentech was characterized by a focus on innovation and growth. He oversaw the development of new therapies for cancer, diabetes, and eye diseases, and the company's revenue grew significantly under his leadership. In 2002, he was appointed as the CEO of the biotechnology company, Amgen, where he continued to drive innovation and expansion.

In 2006, Geras was appointed as the CEO of the world's largest biotechnology company, Genentech, which was later acquired by Roche. During his tenure, he continued to focus on innovation and growth, leading to the development of new therapies for cancer and diabetes. In 2011, Geras was appointed as the CEO of Dow Chemical, a leading chemical company.

Geras is a member of several advisory boards and committees, including the Board of Trustees of the National Academy of Sciences, the Board of Directors of the Biotechnology Industry Organization, and the Board of Directors of the American Chemical Society.

In recognition of his contributions to the biotechnology industry, Geras has received numerous awards and honors, including the Presidential Award for Excellence in Economic Growth, the National Medal of Science, and the National Medal of Technology.

Geras is married and has two children. He enjoys playing golf and traveling in his free time. He is also a passionate advocate for education and has served on the boards of several educational institutions.

George Mitchell is More Transformative Than Barack Obama

By Paul Rosenberg, The National Herald

Free from board of George Mitchell, other than energy

industry's specialty. But when his
tory is told, Mitchell will have
transformed the energy indus-
try in ways no one could have
even predicted when he took
under his watch the dollars
of the multibillion-dollar film
"Avatar" and "Titanic."

"Avatar" was released in 2009, before being appointed
Chief Executive Officer in 2007, Premiere counted them
among the most successful films under his watch including
"Slumdog Millionaire" and "Titanic."

Gianopoulos, referring with
"The Simpsons" to "the矾 age," put
Gianopoulos, however, has given
him with its Humanitarian
Committees for The Fulfillment
Foundation, The City of Hope and the
Multiple Sclerosis Society for
Lupus Research and others. He
