The National Herald proudly presents its inaugural 40 Under 40 edition!

Read 40 incredible bios of young people with Hellenic heritage who have dedicated their lives to helping others and are paving the way for others to follow them.

From artists to doctors... from journalists to politicians... and every field in between... this next generation showcases the traditional Greek spirit by honoring their past and helping their future thereby exemplifying the true meaning of Greek culture in their careers.

We congratulate these rising stars and acknowledge their wonderful achievements!  

Aliz Koletas
Eleni Antoniadou, 28

“Where there might have been despair in the face of one patient, she replied to those who hope, to that which is termed hope in the language of the disabled.” There is a fundamental shift in the definition of the disabled in the community of this page.

Nikos Augustinos, 21

“Augustinos graduated from the University of Athens in 2017 with a BSc in Mechanical and Aeronautical Engineering. Upon graduation, he began a career with Yokogawa Electric Corporation, where he has been employed for 8 years. Currently, he is a Senior Project Engineer in the Automation Systems Division. His work involves developing and implementing solutions for the semiconductor industry, healthcare, and chemical industries. His passion for technology drives him to continuously seek new opportunities and challenges in his career.”

Eleni Antoniadou, 28

“Eleni Antoniadou is a self-described ‘polyglot’ who has lived and worked in many countries, including England, France, and Spain. She is fluent in Greek, English, and Spanish and has a passion for learning new languages. She has a Bachelor of Arts in International Relations from the University of Athens and a Master of Science in International Relations from the London School of Economics. Her work involves developing and implementing solutions for the semiconductor industry, healthcare, and chemical industries. Her passion for technology drives her to continuously seek new opportunities and challenges in her career.”

John "Akezz" Arvanitis, 22

“I am a musician who plays the piano and the guitar. I also enjoy playing video games and watching TV. I enjoy spending time with my friends and family.”

Niko Bonatsos, 32

“Niko Bonatsos, the CEO of Arvanitis, is a venture capitalist investing in technology startups in the US and Europe. He was a general partner at General Catalyst Partners, a leading venture capital firm, and a board member of General Catalyst in Europe. He is also a board member of the Techstars ecosystem, a global network of entrepreneurs and mentors.”

music that his message of opportunity and idealism will ignite a new among millennials, maybe even those at odds with the GOP. His message is two-fold: there are just as many Republicans as Democrats out there that are concerned with helping people and creating authentic and lasting connections with candidates so they believe even "Now" starting The Muse five years ago, Alexandra Cavoulacos, the CEO and co-founder of The Muse, has been a major force for change in the most crucial area for Millennials and beyond: changing the way candidates find their ideal jobs and helping employers find their best candidates. Sel...
Christopher Michael Dodd, 40
Christopher Michael Dodd has followed his unique Greek-American grandparents into the field of medicine, bringing compassion and medicine to patients around the world. His career has turned him into a medical leader in the Western hemisphere. 

Dodd, a native of Santa Barbara, California, is the founder and president of Maria en Salud. 

Maria en Salud (APS) was launched in 2015 to provide health care to people currently not reaching them. APS is a patient-focused organization that employs a concierge model of care specifically designed for socially complex patients locally. This model focuses on creating localized care teams to spend extended time with patients in underserved rural communities which focus on improving health and creating “one-man hospitals” or small rural hospitals, for patients in need. Since his graduation, APS has been recognized as one of the top health care providers in rural countries who matter to him.

Christopher Michael Dodd was born to John and Maria Dodd. Christopher and Maria were raised in the small beachside town of Pismo Beach, California. 

Christopher Michael Dodd graduated Cum Laude from New York University School of Medicine (NYUNM) and was named to the National Honor Society (NHS). He received his undergraduate degree in biological sciences from the National Technical University of Athens in 2014, when he graduated with summum laude and was named to the 2015 standing Academic Achievement Award at the Graduate Level in Management Information System (MIS) at DeVry University in 2015. He is currently a third-year resident at the Department of Orthopedic Surgery at the University of Medicine and Dentistry of New Jersey (UMDNJ), New Jersey. 

Dodd has worked at the Republic Bank of NY in New York, New Jersey and London, spending time with his wife Maria when he could. Dodd became refugees in Greece and spent time with his family and family members while working at the Republic Bank of NY in New York. 

Dodd is the son of John and Maria en Salud (APS). He currently serves as the program director for the University of Medicine and Dentistry of New Jersey (UMDNJ), New Jersey. 

Dodd is the founder and president of Maria en Salud, a non-profit launched in 2015 to support the people in need of the Americas. Dodd is also the founder of Maria en Salud, a non-profit launched in 2015 to support the people in need of the Americas. Dodd is also the founder of Maria en Salud, a non-profit launched in 2015 to support the people in need of the Americas. Dodd is also the founder of Maria en Salud, a non-profit launched in 2015 to support the people in need of the Americas.

Dodd has worked at the Republic Bank of NY in New York, New Jersey and London, spending time with his wife Maria when he could. Dodd became refugees in Greece and spent time with his family and family members while working at the Republic Bank of NY in New York.

service and other entertainment and connectivity services for the public. The flight itself is a means to transport people. She talks about the different types of flights and the experience of flying. "I began flying a smaller turbo-propeller aircraft called a King Air 30. Shortly after, the company acquired a larger plane called a Challenger 600 and trained me to fly it. After about two years, the company acquired a Boeing 737 and trained me to fly it. A pilot's life is full of travel and that is true for Kountoures when she travels on a weekly basis from one end of the United States, to Canada, and the United Kingdom, Germany, and the Middle East. She talks about the changes she has witnessed in the industry and her own personal growth. She explains, "Flying my first trip across the Atlantic Ocean has been my most memorable moment so far in my career. There is no radar cover over the ocean, so flying is an uncertain and exciting field. I have often been challenged by the weather, but flying over land is more predictable and training. And I had the most rewarding fulfillment after completing my first trip across the Atlantic.“ There are challenges in the air but Kountoures wellness lies in the knowledge that she is doing what she loves.

There are many validations that could reflect whether a successful flight happens as planned or not. For example, the company decides they want to reach their destination safely and on time, or their destination is a special location for them. The flight itself is a means to transport people. She explains, "I have been so inspired by each passenger that I have carried with open arms. She explains, "These changes.” But she’s also flying a 737 and trained me to fly it also.”

The company acquired a Boeing 737 and trained me to fly it also,”

He was investing at age 20 Marangoudakis is a graduate of Brown University's Molecular Biology, Cell Biology and Biochemistry program. His family is from Crete and he has been translated into non-redundant journals and books and speaking on the matter.

Demetri Maxim, 18

Some high school entering college is planning for future football games but not Demetri Maxim. "It's developing a new technology in "gives" kineticity from 3-D printed scaffolds that potentially afford a novel approach to bone healing.

He explains saying, "My family has been affected by polydactyly, so I have a deep understanding of genetic conditions, and when I was 15 years old, I was diagnosed with this trait.

I was assigned to a task as a young student, so I learned about bone structure. I also learned about biology and biochemistry. In high school, I was fascinated by the way that bone cells grow and differentiate. I decided to pursue a career in biomedical engineering at the University of Pennsylvania, where I am currently a sophomore.

During my time at Penn, I have been involved in several research projects, including the development of new bone regeneration techniques and the study of bone tissue engineering.

I am currently working on a project to develop a new class of bone scaffolds that can be personalized to each individual's needs. We aim to create a personalized scaffold that can grow alongside bone cells, allowing for the regeneration of bone tissue.

I am excited to continue my research and to contribute to the field of bone regeneration. I believe that this area of research has the potential to significantly impact the lives of individuals with bone disorders and injuries."

Katerina Mountanos

Olive oil, beauty products and a new online business are among the ventures of Katerina Mountanos, who is a Greek-American of varying ages. She is a co-founder of Manicube, a fast growing startup that was founded in 2013 by Michael and his father Stavros Mourkakos.

"Congratulations to all 40 under 40!" Mountanos said, "I am thrilled to be recognized for my achievements as a Greek-American entrepreneur."

"I have always been passionate about entrepreneurship and I am grateful for the support and guidance of my family and friends."

Mountanos received her B.A. in Economics from Binghamton University and her M.B.A. from NYU Stern School of Business. She has also received recognition as the recipient of the National Hellenic Society's "40 Under 40" award and the "Top Women in Digital Award and ACE Award for Women in Programmatic" adversting by an industry publication. She is currently working on a new business venture that aims to bring Greek beauty products to the United States.

"My business is all about connecting Greek Americans with their heritage and culture. I want to create a platform that allows people to discover and explore their Greek roots.

"I am excited to continue my work and to see where this journey will take me."

Athena Papadopoulos

"As a child, I wanted to be a ballerina," says Athena Papadopoulos, who is a Greek American of varying ages. She is a dancer and performer who has been involved in the performing arts for over 20 years. She is also an avid runner and member of the Chicago & San Francisco. In November 2016, she was awarded Best in Category in Cycling and Running magazine for her 4-month old daughter.

"The best thing about my job is that it doesn't feel like work. Not only am I able to pursue my passion for dance, but I am also able to inspire and impact the lives of others."

"I am grateful for the opportunity to continue growing and learning as an artist."

Nicole Pangios, 38

"At a child, I would have liked to be a marine biologist," says Nicole Pangios, who is a Greek American of varying ages. She is a marine biologist and cultural anthropologist who has been involved in marine research for over 10 years. She is currently working at the University of Miami's Rosenstiel School of Marine and Atmospheric Science.

"I am excited to continue my work and to continue growing as a scientist and a leader in the field of marine biology."

"I am grateful for the opportunity to contribute to the understanding of the marine environment and to continue making a difference in the field."

Michael and his father Stavros Mourkakos, Owners

"Congratulations to all 40 under 40!" Mourkakos said, "I am thrilled to be recognized for my achievements as a Greek-American entrepreneur."

"I have always been passionate about entrepreneurship and I am grateful for the support and guidance of my family and friends."

"I am excited to continue my work and to see where this journey will take me."
